

GILBERT GUCELA

FULL STACK SOFTWARE DEVELOPER

✉ gilbertgucela11@gmail.com

☎ 0938-189-1941

📍 Clark City, Pampanga

SUMMARY

With nearly 3 years of experience in software development, I specialize in building web and mobile applications with a focus on clean, maintainable, and scalable code. I hold a degree in Information Technology, majoring in Web and Mobile Application Development (2023).

I'm passionate about continuous learning and currently exploring agentic AI to accelerate development and build smarter, more efficient software products.

WORK EXPERIENCE

Backend / Full Stack Developer , Trackerteer Web Dev.Corp Nov 2023 – Present

- **Played a key role in the successful BIR accreditation of a Point-of-Sale (POS) system**, contributing to both backend logic and compliance-related requirements.
- **Implemented an automated e-Invoicing system** for Malaysian clients within an ERP solution, ensuring compliance with LHDN's MyInvois specifications and streamlining client billing processes.
- **Contributed to the development of an ordering application** (similar to Grab), handling core backend features in **Laravel** and assisting in building responsive frontend components with **React**.
- **Developed API endpoints** for both web and mobile platforms in a task management application, implementing robust backend logic using **Laravel**, and actively contributed to the user **interface design**.

Software Engineer Intern, Hooli Software Feb 2023 – June 2023

- Collaborated with experienced Software Engineers at **Hooli Software** on a real-world company project, gaining hands-on experience with the **Go programming language**.
- Collaborated closely with **senior Software Engineers at Hooli Software**, benefiting from hands-on **mentorship and guidance** throughout the development process.
- Contributed to the **development, feature enhancement, bug fixing**, and ongoing **maintenance** of a production-level system focused on **Software Composition Analysis (SCA)**.
- This internship significantly strengthened my skills in backend development, version control, collaboration and gave me exposure to industry best practices in collaborative software engineering.

Lead Programmer, Pangasinan State University Oct 2022 – Feb 2023

- Developed a full-stack web application to track close contacts of students and staff within the university using the **MERN (MongoDB, Express.js, React, Node.js)** stack. This solo project was completed as part of my college capstone, where I self-studied the technologies involved, as they were not formally taught in our curriculum.
- **QR Code-Based Contact Tracing**: Enabled individuals to scan in/out of campus locations, allowing real-time monitoring of interactions.
- **Attendance Monitoring System**: Leveraged QR scans to automate attendance logging for both students and staff.
- **Google Maps Integration**: Visualized movement and check-in history within the campus to help identify potential exposure.

KEY ACHIEVEMENTS

Professional Software Development Experience

- Applied and expanded my expertise as a full-time developer, working on real projects that involve full-stack development, troubleshooting, and collaborating with teams to deliver functional software solutions.

Hands-On Internship Experience

- Gained practical knowledge in software engineering through an intensive internship, contributing to real-world web applications and strengthening skills in both frontend and backend development.

Self-Learning Initiative

- Self-learned industry-standard technologies such as React, Node.js, MongoDB, and Express.js outside of formal education, demonstrating adaptability and a strong drive for continuous learning.

Capstone Project

- Independently developed a full-stack QR-based contact tracing and attendance system for Pangasinan State University using the MERN stack, featuring Google Maps integration and real-time contact tracking — all self-learned through personal initiative.

EDUCATION

Bachelor of Science in Information Technology

Pangasinan State University, Urdaneta Pangasinan

- Major in Web and Mobile Technologies
- Graduated – September 2023

English Communication NCII

Goldgates Academy, Tarlac City

- Completion Date – April 2012
